

The World's First AI-Powered Energy Rebate Token

Turning electricity bills into Digital Wealth for Everyone

NEXT Token

The Blue Ocean & White Ocean Difference

Blue Ocean – Innovation & Creation

What it means: Blue Ocean is about creating new opportunities instead of competing in existing markets. It means using new and original ideas that no one has done before, opening new industries and spaces for growth through creativity and technology.

How we apply it: NEXT applies this idea by developing the Proof of Energy (POE) system. As energy costs continue to rise, NEXT turns this lifelong expense into a new source of benefits and rewards, allowing people to gain value from energy instead of only paying for it.

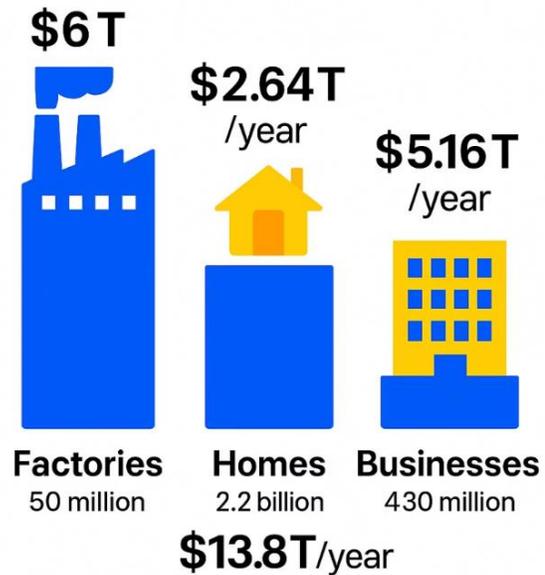

White Ocean – Purpose & People

What it means: White Ocean is about helping people and supporting communities everywhere. It focuses on honesty, fairness, and making sure innovation improves lives, not just profits.

How we apply it: NEXT applies this idea through the NEXT Electricity Rebate System, which helps to reduce monthly electricity costs for everyone. At the same time, the Proof of Energy (POE) system allows people to benefit from constantly rising energy costs, turning what was once a burden into ongoing benefits and rewards for the community.

The World Runs on Electricity

The Global Problem

USD 13.8 Trillion

spent annually on electricity

- Globally over
 - 2.2 B Households
 - 50 M Factories
 - 430 M Businesses
- Residential and Industrial exceeds USD 8.64 trillion
- Represents 10% of Global GDP, yet consumers see zero return on this essential expense

The NEXT Solution (Gain Point) – NEXT Electricity Rebates

NEXT Turns electricity bills into Digital Rebates

Up to 25% Monthly Rebate

Every user receives substantial monthly rebates on electricity spending, transforming costs into returns

Rebates in NEXT Tokens

Rebates are distributed in NEXT Tokens, creating real demand, genuine participation, and lasting value

Expense Becomes Asset

What was once a lifetime expense is now a share of the global energy economy and your digital wealth

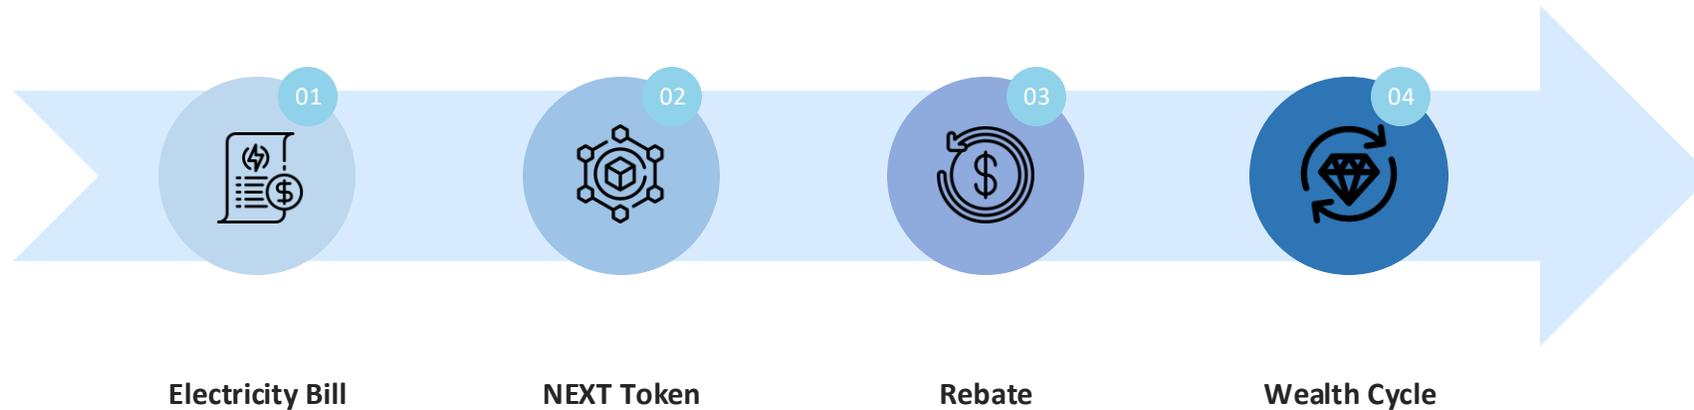

From Electricity to Digital Wealth

Electricity powers every home, business, and industry but remains a **lifetime expense**.

The NEXT Token transforms this cost into an asset (NEXT Token) through NEXT AI-driven Rebate Algorithm.

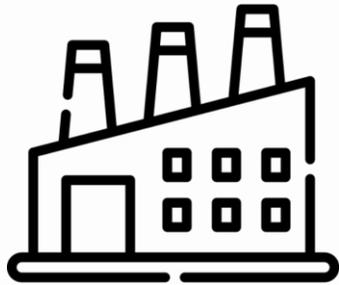

Built on real liquidity and measurable value , **1:1 Minting**, 0 Speculation, 100% Transparency.

From Pain Point to Gain Point

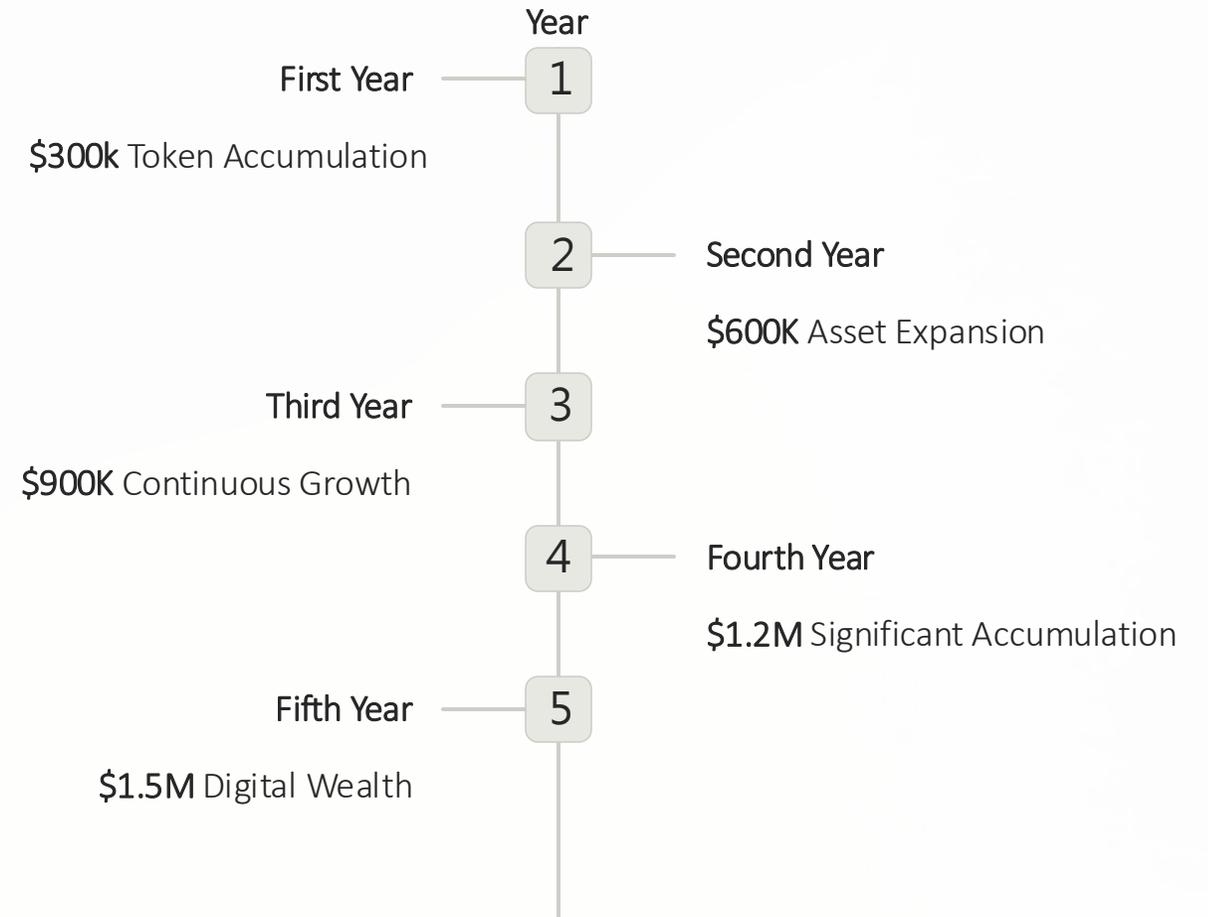

Rebate Scenario

Factory Rebate Impact Example

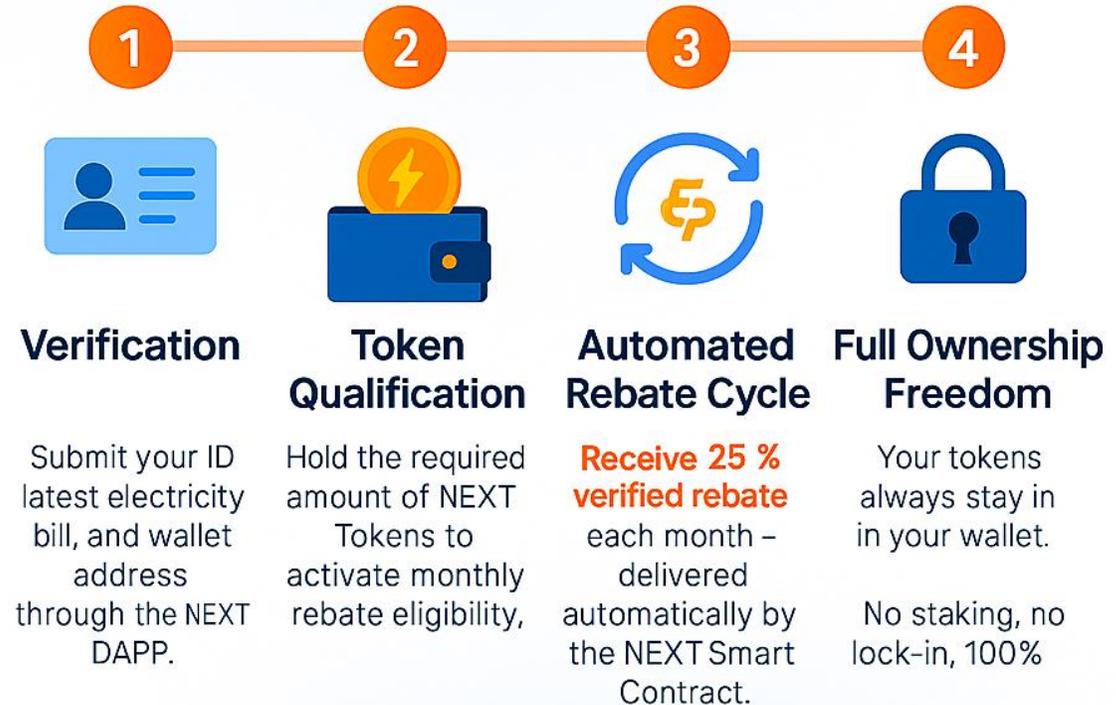

- A factory spending USD 100,000 monthly on electricity usually treats it as a fixed cost.
- With the NEXT Rebate System, 25% (USD 25,000) is returned in NEXT Tokens, turning every electricity payment into a digital asset.

Over five years, this single factory could accumulate USD 1.5 million in token value, transforming a recurring expense into long-term digital equity.

How the NEXT Rebate System Works?

How the NEXT Rebate System Works

Every rebate token is created 1:1 at company cost (\$0.0000357), ensuring full transparency verified liquidity.

The NEXT Solution (Gain Point) – Proof of Energy (POE)

Daily Token Emission Over Time

Emission Rate

7,200 NEXT/day distributed to the global energy-activity pool

Halving Mechanism

Halves every 2 years or at each 10× price increase, ensuring scarcity

Long-Term Sustainability

100-year emission schedule ensures ecosystem longevity and stability

Reward Basis

Verified energy activity through NEXT ecosystem — no speculation, only real usage

Collective Earnings

Users collectively earn tokens from the global energy-activity pool based on participation

Phase 1

Join the foundation phase of the world's first AI-powered Energy Rebate Token.

Be part of the world's first AI-powered Energy Rebate Token from day one. Phase 1 offers exclusive early member rewards and priority access to future phases.

Launch Date

28th October 2025

7-day exclusive pre-sale period

Starting Price

USD 0.05 per token

Ground-floor opportunity for early adopters

Launch Platform

NEXT DApp

BEP-20, Binance Smart Chain

Purchase Rules

Packages must be bought **sequentially (no skipping)** this ensures fair access and balanced distribution across all participants

Qualification Benefits

Phase 1 members gain **priority entry** to Phase 2 rewards, early buyers unlock first access to advanced ecosystem features

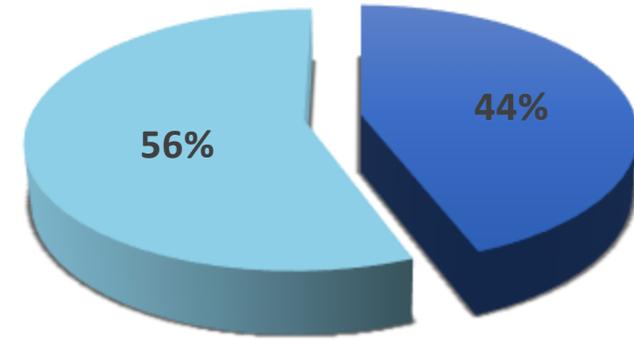

Token Allocation & Minting System

Designed for Growth and Transparency

Total Supply and Allocation

Category	% of Total	Tokens
Token Sale (Public and Packages)	44.0000%	440,000,000
Team and Management (Unified)	15.0000%	150,000,000
POE (Proof of Energy)	1.0519%	10,519,200
Staking Rewards	5.0000%	50,000,000
Performance Milestone System	5.0200%	50,200,000
Exchange Development	3.0000%	30,000,000
IT and Infrastructure	3.0000%	30,000,000
Reserve	23.9281%	239,280,800
Total	100.0000%	1,000,000,000

Token Allocation

■ Public Circulation ■ Company Reserve

44% Public Circulation Tokens

- Fuels **community participation and liquidity expansion**.
- Fully **market-driven**, held by users, powering **rebates, staking, and POE rewards**.
- Represents the **value layer** of the NEXT ecosystem.

56% Company Reserve Tokens

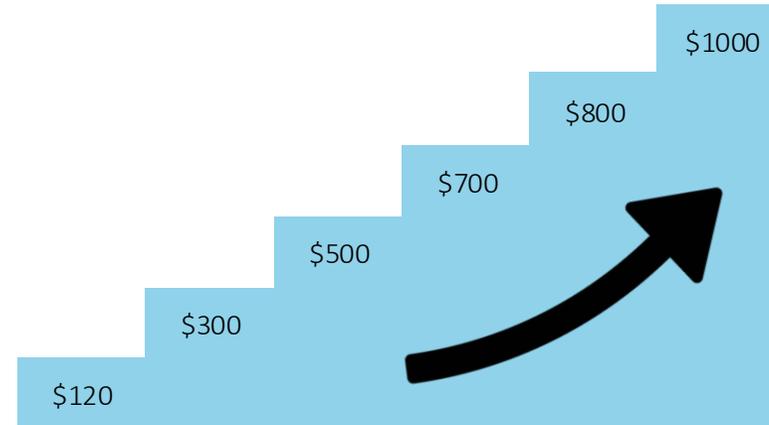

- Designed to **sustain the ecosystem**, not for profit.
- Used for **rebates, POE emissions, infrastructure, and development milestones**.
- Minted under the **1:1 verification rule**, with **multi-signature governance**.
- **Creation cost:** USD 0.0000357 per token, ensuring full transparency and accountability.

Package Pricing & Tiers

Empowering Fair Access and Balanced Growth

Structured participation ensures every member can join the NEXT ecosystem, with sequential purchasing protecting market stability and community interests.

Package	Package (USD)	Token Value (USD)	Direct Sponsor (USD)	3-Level (USD)	Company (USD)	Liquidity Pairing (USD)
1	\$120	40	50	10	10	10
2	\$200	90	50	10	20	30
3	\$300	145	50	10	20	75
4	\$400	210	50	10	20	110
5	\$500	285	50	10	20	135
6	\$600	370	50	10	20	150
7	\$700	445	50	10	20	175
8	\$800	550	50	10	20	170
9	\$900	665	50	10	20	155
10	\$1,000	790	50	10	20	130

Launch Information

- Launching on **Binance Smart Chain (BEP-20)** via **NEXT DAPP**
- 7-day pre-sale starts **28 October 2025**

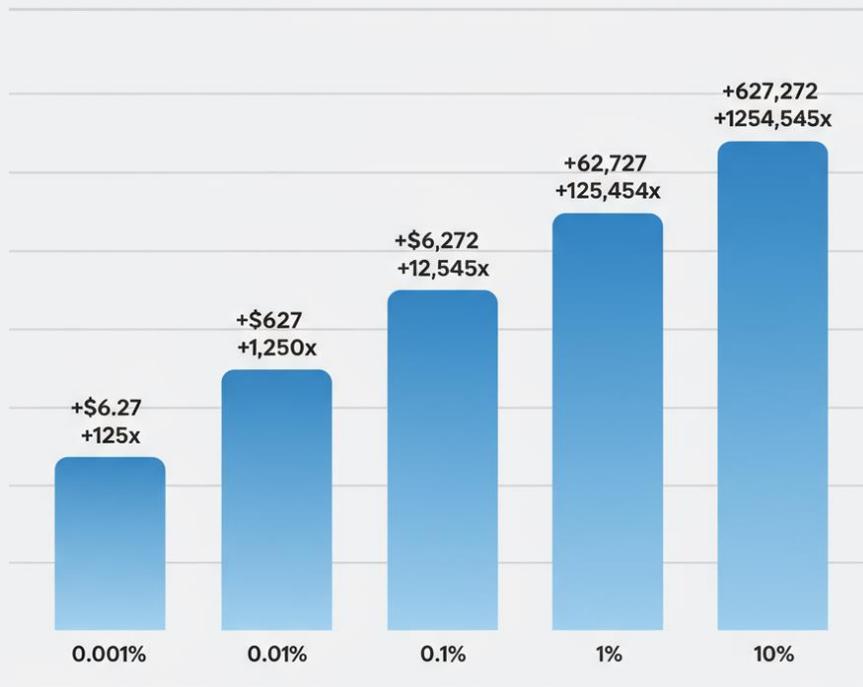

Purchase Rules

- Tokens must be purchased **sequentially** — no skipping packages
- Ensures fair distribution and prevents market manipulation

Token Potential Scenario

Illustrating potential valuation impact from global electricity spending

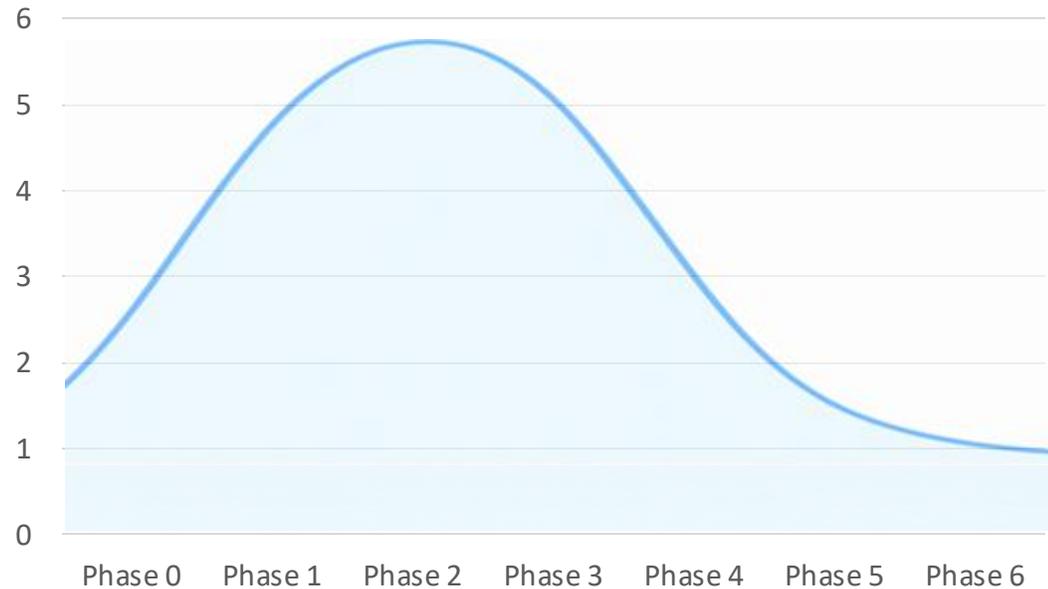

Projection Chart

Global Spend Participation	Implied Value (USD/X)	ROI (from \$0.05)
0.001%	\$6.27	+125x
0.01%	\$62.73	+1,255x
0.1%	\$627	+12,545x
1%	\$6,273	+125,455x
5%	\$31,364	+627,273x
10%	\$62,727	+1,254,545x

Token Step-Up Pricing Framework

Step-Up Curve Model

The Step-Up Pricing Framework governs how the NEXT Token's value evolves through verified liquidity accumulation rather than speculative activity. Each USD 1,000 increase in verified liquidity results in a proportional increase in the base token price.

This mechanism aligns market growth with actual participation, ensuring transparency, predictability, and sustainable appreciation over time.

Token Step-Up Pricing Framework

Market Control

Establishes market control and disciplined growth, avoiding volatility from speculative trading and pump-and-dump schemes.

Strategic Valuation

Acts as a strategic valuation mechanism to progressively elevate token price in sync with real liquidity inflows, creating predictable growth patterns.

Long-Term Sustainability

Promotes long-term sustainability through transparent, rule-based price discovery anchored in verified economic activity.

Investor Confidence

Reinforces investor confidence by maintaining a data-driven, liquidity-linked valuation model that's auditable on-chain.

NEXT Road Map

Proof of Concept on Binance Chain

Token value surged by **545%** during POC testing on BNB Chain, validating market demand and technical feasibility for energy-backed tokenization.

2022

Token Pre-Sale & Exchange Listing

Pre-sale launched at **USD 0.05** with 1:1 minting and listing on NEXT DApp via Binance BEP-20. Strategic partnerships onboarded and exchange integration underway.

2025

Infrastructure Expansion & Full Deployment

Commissioned NEXT Data Centers for industrial-scale hosting and launched a 1,000-hectare Industrial Park with a 30-acre smart Residential Township. Integrated NEXT Token across industrial, retail, and gaming ecosystems.

2027

2023

VARA Dubai Regulatory Milestone

Secured **Pre-Approved License** from Dubai's Virtual Assets Regulatory Authority (VARA), establishing NEXT as a **regulation-ready, globally recognized** energy token ecosystem backed by proven energy production credentials.

2026

Ecosystem Activation & Consumer Rewards

Monthly Rebate System rewards verified energy consumers. Proof of Energy (POE) validation launched. Staking programs activated. NEXT Academy established to train energy entrepreneurs and ecosystem contributors.

Vision Statement

From Energy Cost to Shared Prosperity, building an economy of owners, not consumers.

Minting System

01

Every NEXT Token is minted only on a 1:1 basis when matched with verified capital, ensuring genuine price discovery, zero speculation, and long-term stability sustained by real liquidity.

Transparency, Token Flow, and Performance-Based Release

02

All token movements, emissions, and releases are audited through on-chain or multi-signature verification. Rewards are only unlocked after verified execution, guaranteeing fairness and accountability.

Early Participation Gains

03

Early contributors access the ecosystem at the lowest entry price and enjoy early utilities such as energy Rebates, POE rewards, and governance rights, capturing the greatest growth potential before public market exposure.

Supported by Real-World Infrastructure

04

Backed by over 23 years of experience in electricity generation, transmission, and distribution, the NEXT ecosystem is built on proven operational foundations. This deep industry expertise ensures sustainable scalability, reliable infrastructure, and long-term token value growth.
